GITHUB: https://github.com/codelawd | **LINKEDIN**: https://linkedin.com/in/codelawd

Result-driven Software Engineer with 5+ years of experience building scalable web and mobile applications using React, Next.js, Node.js (NestJS/Express), and MongoDB. Specialized in backend architecture, AI integrations, and cloud deployments (AWS, GCP). Proven success leading teams, delivering high-impact products, and mentoring junior developers. Passionate about building secure, high-performing systems for global users.

Languages:	JavaScript, TypeScript and Python
Frontend:	React (Next.JS), Tanstack Query, Tailwind, Chakra UI, Redux
Backend:	Node.js, Express, NestJS
Databases/ORM:	MongoDB (Mongoose), SQL and Postgres (Prisma, TypeORM)
Cloud & DevOps:	AWS, GCP, Zeet, Serverless, Vercel, Heroku
Tools & Platforms:	Git, Jira, Slack, Swagger (OAS 3.0)
AI/Agents:	Lanchain, LangGraph, Anthropic, OpenAI

WORK/TECHNICAL EXPERIENCE

Frontend Engineering Lead – Pather

August 2024 – Present | London, UK | Consultant | Remote

- ✓ Led the frontend team in delivering an intuitive and engaging user experience for Pather's platform, where learners could connect with industry experts to advance their skills and fulfill their aspirations.
- ✓ Developed and introduced new features with cross-functional teams aligned with Pather's mission of making high-quality education accessible, as part of the company's "One Million Mission" to build a network of over a million experts.
- ✓ Assigned tasks, conducted review code, and established coding standards that built a culture of excellence that boosted team productivity by 40% and accelerated feature delivery.
- ✓ Advanced cutting-edge front-end technologies, including React, Next.js, and TypeScript, for better performance, accessibility, and scalability of the platform, which resulted in a 30% improvement in page load speed.
- ✓ Mentored and upskilled junior developers, creating a growth-oriented team environment that supported career development and innovation
- ✓ Actively contribute to Pather's vision of bridging knowledge and aspiration, creating a limitless ecosystem of knowledge-sharing that empowers users to thrive.

Software Engineer – Nophin Inc.

May 2023 – October 2024 | NY, US | Full Time | Remote

- ✓ Led the development of **CRESA**, an AI CRE Screening Analyst. CRESA is an AI Agent that screens multifamily deals, conduct market research, analyzes documents, generates reports 24/7, and send emails —empowering clients to focus on making the best investments.
- ✓ Defined the frontend architecture and technology stack to ensure efficiency and scalability.
- ✓ Established coding standards and best practices for consistent and maintainable code.
- ✓ Cultivated a collaborative and innovative team environment to deliver high-quality frontend experiences.
- ✓ Architect, design, and implement scalable and efficient backend systems and APIs to support the company's AI-driven commercial real estate underwriting platform.
- ✓ Develop and maintain robust, and secure backend services using technologies such as TypeScript and Nest.js.
- ✓ Actively contribute to the software development lifecycle, from initial ideation and planning through to implementation, testing, and deployment.

Backend Engineer – Landa

January 2023 – August 2023 | Lagos, Nigeria | Contract

- ✓ Developed and maintained the backend system using NestJS backend framework.
- ✓ Implemented various features and functionalities to improve platform performance and user experience.

- ✓ Utilized MongoDB for data storage and management, including creating and optimizing database schemas.
- ✓ Implemented documentation for API endpoints utilizing the OpenAPI Specification (OAS) 3.0 and Swagger tool.
- ✓ Collaborated with the front-end development team to ensure seamless integration of the backend with the front-end.
- ✓ Followed best practices for security and scalability in the backend development process.
- ✓ Implemented CI/CD pipeline using Serverless, AWS and Git.

Full Stack Software Engineer – Radartrail Communication Limited

August 2022 – April 2023 | Lagos, Nigeria | Hybrid

- ✓ Led the development of the Pulse App, a SASS employee engagement and performance management platform.
- ✓ Develop RESTful APIs for web and mobile applications, ensuring that they are efficient, scalable, and maintainable.
- ✓ Work with clients to understand their needs and requirements, and translate those into technical solutions.
- ✓ Work closely with project managers and other stakeholders to ensure that projects are delivered on time and to high standards.
- ✓ Collaborate with team members to design and implement solutions that meet the needs of clients.
- ✓ Lead teams of engineers and developers, providing guidance and support as needed to help ensure the successful completion of projects.
- ✓ Conducted code reviews and made updates to improve efficiency and maintain high quality standards.

Senior Frontend Engineer – Brooks and Blake

May 2022 – July 2022 | Lagos, Nigeria | Hybrid

- ✓ Led the frontend development team, providing guidance and support to junior team members as needed.
- ✓ Designed and implemented the frontend architecture of web applications, using technologies such as React (NextJS), TailwindCSS, Redux.
- ✓ Participated in code reviews and provided feedback to improve the quality and efficiency of the codebase.
- ✓ Collaborated with the design and back-end development teams to ensure that web applications were visually appealing, user-friendly, and efficient.
- ✓ Stayed up-to-date with the latest developments in frontend development and applied this knowledge to your work to ensure that the company's web applications were cutting-edge and competitive.

Web Developer/Lead Instructor – Softrays Information Technology

January 2018 – May 2022 | Ilorin, Nigeria | On-site

- ✓ Developed and maintained the company's web application using the MVC pattern, utilizing technologies such as Bootstrap, EJS, and Node.
- ✓ Worked on various projects individually and as part of a team, using Javascript technologies to deliver high-quality solutions for clients.
- ✓ Created wireframes, mockups, and prototypes for products and oversaw their deployment, ensuring that projects were delivered on time and to high standards.
- ✓ Trained over 100 students in core programming concepts, web accessibility, and scalable web application development, emphasizing the importance of building reusable components and designing user-friendly interfaces.

PROJECTS LED

CRESA – AI Powered Commercial Real Estate Screening Analyst

- ✓ Designed and built an AI Agent that autonomously screens multifamily real estate deals.
- ✓ Automates market research, document analysis, PDF report generation, and client communication via email.
- ✓ Reduced manual analyst workload by over 70% and improved deal turnaround time.
- ✓ Fully integrated with Nophin's AI-driven real estate underwriting platform.

PULSE – Employee Engagement SaaS Platform

- ✓ Full-stack lead on the development of an internal performance management platform used by the company and its subsidiary organizations.
- ✓ Built RESTful APIs and collaborated with internal stakeholders to translate operational goals into scalable technical solutions.
- ✓ Enabled over 100 employees across 4 subsidiary companies to track performance metrics, engagement levels, and feedback in real time.

VOLUNTEERING

Frontend Developer – TalkAmNaija

October 2021 – December 2023 | Tallin, Estonia | Remote

- ✓ Developing the frontend architecture of the TalkAmNaija platform using Vue JS and Tailwind CSS.
- ✓ Collaborating with the team to design and implement features that support the platform's goal of enabling citizen engagement with authorities.
- ✓ Ensuring that the platform is user-friendly and accessible to users of all levels of technical proficiency.
- ✓ Participating in code reviews and other team-wide processes to ensure that the platform is of high quality and meets the needs of its users.
- ✓ Contribute to the ongoing development and evolution of the platform, working to improve its functionality and user experience.
- ✓ Help to support the overall mission of the platform by enabling citizens to more effectively engage with authorities and report societal issues.

Python Instructor – Tech Nexus

October 2020 | Dept. of Information and Communication Science, University of Ilorin.

- ✓ Led Python training sessions for students interested in learning data science
- ✓ Developed and delivered lesson plans and instructional materials that were engaging and effective for students.
- ✓ Assisted students in learning Python concepts and techniques, providing guidance and support as needed.
- ✓ Evaluated student progress and provided feedback to help them improve their skills.
- ✓ Contributed to the overall success of the training program by helping students develop a strong foundation in Python and data science.

EDUCATIONAL BACKGROUND

University of Ilorin – Information and Communication Science (B.Sc.)

December 2018 – December 2022 | Ilorin, Kwara State

Federal Polytechnic, Auchi – Computer Science (National Diploma)

December 2015 – January 2017 | Auchi, Edo State
